Professional Summary

Data Engineer with a solid foundation in analytics and machine learning. Experienced in building ETL pipelines, data models, and conducting statistical analysis. Proficient in Python, R, SQL, and cloud platforms. Strong communicator skilled at translating complex technical concepts into actionable business insights.

Education

University of Illinois at Urbana-Champaign

M.Sc. in Business Analytics

Champaign, IL

May 2025

- GPA: 4.0/4.0
- Coursework: Big Data Analytics, Enterprise Database Management, Big Data Infrastructure, Financial Risk Management

University of Lagos

B.Sc. in Electrical and Electronics Engineering

Lagos, Nigeria

Oct 2023

- GPA: 4.38/5.0, ranked top 5% of class

Experience

Data Engineer Intern (Lead)

Credential Engine (Capstone Project)

Washington, DC

Sept 2024 – present

- Designed and implemented a web-based ETL pipeline with Python that structured university support data into CTDL-compliant JSON-LD and Excel formats, enabling scalable reporting across 60+ institutions
- Automated the mapping of 60+ university services by engineering a scraping pipeline that parsed unstructured content from .edu domains into a standardized schema
- Ensured 100% schema integrity by validating JSON-LD outputs against Credential Engine's CTDL ontology across multiple datasets
- Enabled non-technical users to generate structured outputs by building a scalable form interface with Flask and backend logic for no-code data ingestion
- Reduced onboarding time by 80% for developers and partners by authoring comprehensive technical documentation and a user guide

Strategy Consultant

Illinois Business Consulting (IBC)

Champaign, IL

Sept 2024 – present

- Informed strategic recommendations for a top consulting firm by analyzing AI-driven energy demand trends and their impact on grid operations
- Delivered actionable insights by translating complex topics for technical and executive audiences
- Collected cross-sector insights from 10+ professionals by designing a 15-question expert interview guide targeting utility, policy, and data center stakeholders
- Created a presentation deck summarizing 20+ hours of interviews and research into executive-ready insights for the client

Machine Learning Engineer Intern

Babban Gona

Lagos, Nigeria

Nov 2019 – Oct 2020

- Supported development of a computer vision model that predicted crop health from field imagery to aid farmer decision-making
- Improved model accuracy by 10% by annotating 10,000+ agricultural images to enhance computer vision training data

Projects

[AWS Marketing Offers Pipeline](#)

Apr 2025

A real-time, serverless data pipeline built with AWS Kinesis, Lambda, DynamoDB, and S3 to simulate user browsing activity and generate targeted marketing offers.

[Property Valuation Model](#)

Dec 2024

Achieved an R^2 of ~ 0.84 in predicting property values by cleaning 50,000+ real estate records and engineering 20+ features using R and random forest regression

Skills

Programming: Bash, Git, HCL, Make, Python, R, SAS, SQL

Tools: AWS, Databricks, Docker, Git, Knime, MongoDB, Postman, Tableau, Terraform

Certifications: Google Data Analytics Professional Certificate, AWS Certified Cloud Practitioner
