

Mmesoma Udensi

📍 Urbana, IL ✉ mudensi2@illinois.edu ☎ (214) 813-4470 🔗 mmesomaudensi 🌐 udensidev

Professional Summary

Data Engineer with a solid foundation in analytics and machine learning. Experienced in building ETL pipelines, data models, and conducting statistical analysis. Proficient in Python, R, SQL, and cloud platforms. Strong communicator skilled at translating complex technical concepts into actionable business insights.

Education

University of Illinois at Urbana-Champaign

M.Sc. in Business Analytics

Champaign, IL

May 2025

- GPA: 4.0/4.0
- Coursework: Big Data Analytics, Enterprise Database Management, Big Data Infrastructure, Financial Risk Management

University of Lagos

B.Sc. in Electrical and Electronics Engineering

Lagos, Nigeria

Oct 2023

- GPA: 4.38/5.0, ranked top 5% of class

Experience

Data Engineer Intern (Lead)

Credential Engine (Capstone Project)

Washington, DC

Sept 2024 – present

- Designed and implemented a web-based ETL pipeline with Python that structured university support data into CTDL-compliant JSON-LD and Excel formats, enabling scalable reporting across 60+ institutions
- Automated data extraction from .edu domains, mapping 100% of identified support services into a standardized schema and reducing manual effort by 90%
- Achieved 100% schema validation success across multiple datasets by rigorously testing JSON-LD outputs against the CTDL ontology
- Increased accessibility of the tool for non-technical users by 3x by building a Flask-based no-code form interface for data ingestion
- Cut developer and partner onboarding time by 80% through the creation of clear technical documentation and a step-by-step user guide

Strategy Consultant

Illinois Business Consulting (IBC)

Champaign, IL

Sept 2024 – present

- Delivered a client-facing strategy report with insights on AI-driven energy demand trends, informing strategic recommendations for a consulting firm serving the utility sector
- Curated a 15-question interview guide used to engage 10+ stakeholders across utility and data center sectors, expanding the client's industry insight base
- Formulated and analyzed a student survey (n=34) to assess demand for a proposed course supporting students with disabilities, using Excel visualizations to inform feasibility decisions for the client
- Synthesized findings from 20+ hours of primary and secondary research into concise executive summaries and presentations

Machine Learning Engineer Intern

Babban Gona

Lagos, Nigeria

Nov 2019 – Oct 2020

- Boosted model accuracy by 10% by annotating 10,000+ images to improve training data for a crop health computer vision pipeline
- Supported the deployment of the model in a pilot involving hundreds of farmers, streamlining decision-making in rural areas

Projects

[AWS Marketing Offers Pipeline](#)

Apr 2025

A real-time, serverless data pipeline built with AWS Kinesis, Lambda, DynamoDB, and S3 to simulate user browsing activity and generate targeted marketing offers.

[Property Valuation Model](#)

Dec 2024

Achieved an R^2 of ~0.84 in predicting property values by cleaning 50,000+ real estate records and engineering 20+ features using R and random forest regression

Skills

Programming: Bash, CI/CD, Git, HCL, Make, Python, R, SAS, SQL

Tools: AWS, Databricks, Docker, GitHub, Knime, MongoDB, Postman, Tableau, Terraform

Certifications: Google Data Analytics Professional Certificate, AWS Certified Cloud Practitioner
