## Professional Summary

Data Engineer with strong analytics, data modeling, and tooling experience. Skilled in building scalable ETL pipelines that power real-time analytics and optimize user experiences. Adept at translating product goals into data architecture, ensuring data integrity, and driving cross-functional insights. Proficient in SQL, Python, and AWS. Thrive in fast-paced, data-driven environments and bring a strong sense of ownership to every data domain I support

## Skills

**Languages:** Python, SQL (MySQL, PostgreSQL), Bash, R, SAS

**Tools:** dbt, Airflow, AWS, Azure, Kafka, Docker, Hadoop, Spark, MongoDB, Terraform, Git, CI/CD, Databricks, Snowflake, Tableau

**Concepts:** Data Modeling, Data Warehousing, OOP, ETL/ELT, Data Visualization, Machine Learning, Statistical Analysis

**Certifications:** Google Data Analytics (Coursera), AWS Certified Cloud Practitioner

## Education

**University of Illinois at Urbana-Champaign**

*Master of Science in Business Analytics*

*Champaign, IL*

*May 2025*

- GPA: 4.0/4.0
- Coursework: Big Data Analytics, Enterprise Database Management, Big Data Infrastructure, Data Storytelling

**University of Lagos**

*Bachelor of Science in Electrical and Electronics Engineering*

*Lagos, Nigeria*

*Oct 2023*

- GPA: 4.38/5.0 (Top 5%)

## Experience

**Data Engineer (Lead)**

*Credential Engine (Capstone Project)*

*Washington, DC (Remote)*

*Sept 2024 – May 2025*

- Built and maintained an ETL pipeline that transformed unstructured educational data into CTDL-compliant formats for a multi-institutional enterprise data warehouse
- Engineered scalable ingestion tools using Python and Flask, reducing partner onboarding time by 80% and improving usability for non-technical users
- Applied schema validation, mapping rules, and audit traceability to ensure accuracy and compliance across 60+ partner institutions
- Collaborated with stakeholders in Agile sprints to prioritize features and integrate feedback into iterative pipeline improvements

**Strategy Consultant**

*Illinois Business Consulting (IBC)*

*Champaign, IL*

*Sept 2024 – May 2025*

- Developed reporting insights and visualizations to support strategic decisions for an AI-focused client in the energy sector, contributing to environmental and regulatory planning
- Designed and analyzed a student accessibility initiative survey (n=34), uncovering behavioral trends that shaped program feasibility; created dashboards for stakeholders using Microsoft Excel
- Synthesized 20+ hours of interviews and research into presentation decks, delivering actionable recommendations to executive audiences

**Machine Learning Engineer Intern**

*Babban Gona*

*Lagos, Nigeria*

*Nov 2019 – Oct 2020*

- Boosted precision of a crop health classification model by 20% by annotating 10,000+ labeled images
- Supported the pilot deployment of ML tools to 500+ farmers, enabling data-driven crop decision-making

## Projects

[AWS Marketing Offers Pipeline](#)

*Apr 2025*

Built an event-driven architecture using AWS Kinesis, Lambda, and DynamoDB to process 5,000+ events/hour. Orchestrated modular ingestion, transformation, and storage layers to power marketing decisions

[Yelp Business Intelligence Data Mart](#)

*Mar 2025*

Designed a star schema and built an ETL pipeline in Azure to analyze 6M+ Yelp reviews. Enabled data-driven restaurant strategy insights using transformed analytics-ready datasets

[Property Valuation Model](#)

*Dec 2024*

Developed a real estate price forecasting pipeline using regression and random forest models ( $R^2 = 0.84$ ) on 50K+ records. Uncovered pricing drivers and supported investment decisions
