Summary

Detail-oriented data professional with hands-on experience in Python, SQL, and cloud big data technologies such as AWS and Databricks. Proven ability to develop scalable data solutions, implement CI/CD practices, and deliver actionable insights using data analytics tools. Skilled in object-oriented programming, data modeling, and reporting

Education

University of Illinois at Urbana-Champaign

Master of Science in Business Analytics (STEM)

Champaign, Illinois

May 2025

- GPA: 4.0/4.0

University of Lagos

Bachelor of Science in Electrical and Electronics Engineering

Lagos, Nigeria

Oct 2023

- GPA: 4.38/5.0

Experience

Data Engineer

Credential Engine

Washington, DC

Sept 2024 – May 2025

- Developed an LLM-powered ETL pipeline leveraging the Gemini API to convert unstructured educational data into CTDL-compliant formats
- Engineered scalable ingestion tools using Python and Flask, reducing partner onboarding time by 80% and improving usability for non-technical users
- Applied schema validation, mapping rules, and audit traceability to ensure accuracy and compliance across 60+ partner institutions
- Collaborated with clients in Agile sprints to prioritize features and integrate feedback into iterative pipeline improvements

Strategy Consultant

Illinois Business Consulting

Champaign, Illinois

Sept 2024 – May 2025

- Developed reporting insights and visualizations on growing AI-driven electricity demand to support strategic decisions for a client advising Fortune 500 companies in the energy sector
- Designed and analyzed a student accessibility initiative survey (n=34) using Qualtrics and Excel, uncovering behavioral trends that informed the feasibility of an adaptive program

Market Research Analyst

JUMO

Cape Town, South Africa

Nov 2023 – Dec 2023

- Conducted comprehensive customer surveys with over 100 respondents to analyze consumer loan preferences, providing insights that improved customer engagement by 15%
- Performed competitive landscape analysis by evaluating 60+ competitors in Nigeria, delivering detailed reports that enhanced market positioning and informed pricing strategies

Machine Learning Engineering Intern

Babban Gona

Lagos, Nigeria

Nov 2019 – Oct 2020

- Boosted precision of a crop health classification model by 20% by annotating 10,000+ labeled images
- Supported the pilot deployment of ML tools to 500+ farmers, enabling data-driven crop decision-making

Projects

[AWS Marketing Offers Pipeline](#)

Apr 2025

Built an event-driven architecture using AWS Kinesis, Lambda, and DynamoDB to process 5,000+ events/hour. Orchestrated modular ingestion, transformation, and storage layers to power marketing decisions

[Property Valuation Model](#)

Dec 2024

Developed a real estate price forecasting pipeline using regression and random forest models ($R^2 = 0.84$) on 50K+ records. Uncovered pricing drivers and supported investment decisions

Skills

Programming: Python, SQL, Bash, R, SAS

Tools: AWS, Airflow, dbt, Databricks, Spark, Terraform, Git, Tableau, Power BI

Concepts: Data Modeling, CI/CD, Data Visualization, Machine Learning, Statistical Analysis

Certifications: AWS Certified Cloud Practitioner, Google Data Analytics Professional Certificate
